Биохимический анализатор SD1

POINT OF CARE TESTING (POCT) FULLY AUTOMATED BIOCHEMISTRY ANALYZER

SD1 Automatic Biochemistry Analyzer is a biochemical analysis system that integrates conventional biochemistry, coagulation, electrolyte and immunoassay items. It is widely used in primary health, emergency diagnostic testing, field rescue and other fields.

Immediate Results Anywhere Anytime

Transfer results to PC

Build results database
(LIS System)

SD1 Automatic Biochemistry Analyzer

Equipped with the latest medical and technological innovations, we have invented a state-of-the-art portable SD1 Automatic Biochemistry Analyzer which provides a better, faster and more accurate diagnosis for blood analysis.

Test up to 40 parameters in total

Test results in 12 minutes

3-step simple operation

ADVANTAGES

Low Sample Consumption

Sample Volume needed is 1/10 - 1/20 of conventional chemistry analyzer.

Easy to Use

No professional skill required.

Maintenance Free

Robust analyzer, no consumables needed, such as tubes, pumps and valves.

Accurate Result

Using the photoelectric colorimetric principle, the SD1 analyzer has many advantages versus conventional dry biochemistry analyzer using the light reflection method. Dilution of test sample is guaranteed Without random errors or cross contamination.

SPECIFICATION

Sample volume	100µl	Testing method	End-point, kinetic, two-point
Bar code	Two dimensional Bar Code	Light source	Halogen tungsten lamp's shelt life is over 2500 hours
Testing time	12 minutes / sample	Power supply	AC 100V-240V, 50-60Hz
Temperature	37°C±0.3°C	Rated power	120VA
Absorbance	0.001Abs	Storage	MAX 500,000 results
Cross infection	0	Display	7 inch 800*480 multi-touch screen, Android system, multi-language support
Sample type	Lithium Heparin Anticoagulant whole blood, serum and plasma	Printer	Built-in thermal printer
Work condition	Temperature:10-30°C Humidity: 30%-70%	Connectors	4 USB interfaces, 1 LAN interfaces
Testing principle	Absorption spectroscopy, Turbidimetry	Weight	4.6Kg
QC&Calibrate	Automatic and real-time		

EASY 3-STEP OPERATION

All steps are automated from centrifugation, dilution, quality control to test result printing.

01 Add Sample (100 μ L)

02 Insert Disc (12-minute testing time)

03 Read Results (immediately)

DISPOSABLE REAGENT DISC

Seamaty Reagent Disc Introduction

Born from space technology research, Seamaty reagent disc is a fully self-contained single-use chemistry reagent disc designed to satisfy a variety of conditions. Just 3-4 drops (100 μ l) of whole blood are required to offer accurate results. The test kit consists of lyophilized reagent beads, diluent and QR code. The reagent disc has a shelf life of 12 months(2-8 $^{\circ}$ C storage). The diluent is contained in the disc. The QR code includes the basic information of the disc.

Intelligent Quality Control

The reagent disc contains a complicated internal quality control system IQC which continuously monitors the disc function to ensure reaction stability and optimal disc performance. IQC is the engine that drives the SD1 accurately and precisely.

Correlation

In countless central-lab correlation studies, the accuracy, precision and reproducibility of the SD1 chemistry analyzer has been proven and approved by the most respected hospitals and commercial around the world.
